EDUCATION

B.S. in Computer Science, **Princeton University**, NJ

Class of 2027

GPA: **3.928**

Honors/Activities:

- **Published author**, "Teaching the Wildlife Trade: A Social-Ecological Systems Approach," Journal of Environmental Sciences, 2025.
 - **Tau Beta Pi Honors Society Scholarship**
 - **Excellence in Research Award** for project in tumor associated macrophages (Governor's STEM Scholars)
 - **NJ Seal of Biliteracy** in Spanish
 - **President of Tau Beta Pi NJ Delta Chapter, top 10% of engineers** at Princeton
 - **President** of Princeton Sketchbook, **Co-founder** of Passionfruit Magazine and Princeton Hindu YUVA
-

INDUSTRY

Product Lead | Develop For Good

2025 - Present

- Lead ~80 engineers across 8 teams delivering production web and data systems for nonprofit partners
- Own product roadmap and technical direction, translating stakeholder needs into engineering plans
- Lead sprint planning, code reviews, and cross-team integration; mentor junior engineers and uphold production standards

Team Lead | COS333 TigerLink Dating App

2025

- Created [full-stack Princeton dating app](#)

Engineer | Develop For Good

2024 - 2025

- Redesigned Youth Neuroscience Association website to streamline chapter data input and organization
- Implemented ML features for America SCORES, including carpool optimization and generative content tools

RESEARCH

Bacterial Gene Transfer Researcher | Princeton HMEI

2026 - Present

- Used synthetic biology techniques to track plasmid movement via horizontal gene transfer

Biomolecular Condensates Researcher | Princeton SURP

2025 - Present

- Developed and simulated biophysical PDE models of enzyme phase separation
- Identified mechanisms governing optimal condensate size in self-organizing systems

ML-based Coral Bleaching Prediction Researcher | Princeton HMEI

2024 - Present

- Built novel coral bleaching dataset by fusing satellite and in-situ oceanographic data
- Trained Random Forest, RNN, and Transformer models to predict bleaching events

Depth-based CNNs Researcher, Princeton LLP

2021 - 2023

- Designed custom RGB+D early-fusion vision transformers incorporating depth sensor data
- Benchmarked against CNN baselines using commercial depth cameras
